## President Trump Restores Law & Order

- **The Trump administration has successfully retooled the CBP One app to be the CBP Home app, a resource to aid in the self-deportation of inadmissible aliens.** This app incentivizes aliens to depart on their own or face the consequences of deportation and a bar of future legal entry to the United States.
- **The number of known gotaways has plunged more than 90% since President Trump took office**, signifying the administration's zero-tolerance policy toward illegal immigration.
- Government data has also revealed that **Immigration and Customs Enforcement (ICE) detention centers are at maximum capacity**, detaining more than 45,000 illegal aliens as ICE monthly arrests have climbed **627%** compared to all of Joe Biden's last year in office.
- The Trump administration has cracked down on Transnational Criminal Organizations (TCOs), instilling fear into major Mexican cartels, **whose members have expressed concern about arrest**.
- The mounting pressure has even led some criminals to **shut down** their fentanyl labs or go into hiding. **This also comes amidst an increasing number of Mexican cartel figures being extradited to the U.S. under the Trump administration**.
- At the Southwest border in February, **CBP encountered 814 unaccompanied alien children (UACs)**—**a 75% drop from the previous month**. The Trump administration's border security policies have deterred human traffickers at the Southwest border.
- On **February 21**, a Haitian national, who entered the country through the CHNV program last year, was **charged with three murders in North Carolina**.
